

Cord Operated Venetian Blind System

Silent Gliss® 8910

Wooden, Aluminium and Leather

Product Information

- Luxurious mono controlled 50mm Venetian blind system - one single cord permits raising, lowering and tilting of the slats.
- Features unique 'continuous drop' action.
- Available with real wood, aluminium or leather slats.
- Matching slat is inserted into the headrail, preventing the need for a valance.
- Wide and attractive slat colour choice.
- Available with fabric tapes, excluding leather slats (extra cost).
- Made to measure.
- The wooden slats can be made flame retardant (extra costs).
- Side-guide option available.

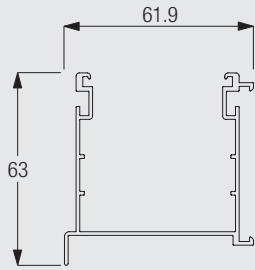

8910

* These colour combinations are recommended, however any other combination is available. Various components to be colour coordinated / painted at extra cost.

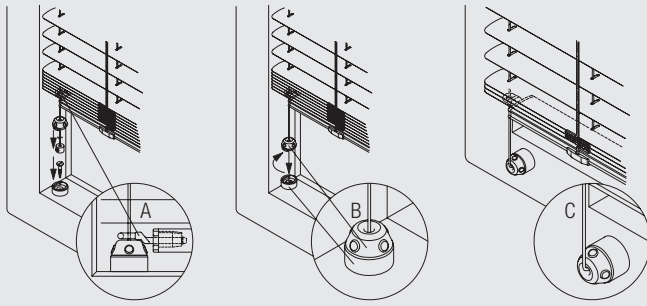

An actual slat is inserted into the headrail for perfect matching of colours and materials.

Silent Gliss' high standards follow through from the super-efficient headrail and excellent slat colour choice to a high level of coordination. An actual slat made from the same material as the blind is fed into the front of the headrail making a cumbersome valance unnecessary. There are various colours of headrail with coordinating components and operating cord, including ladder tapes available. Our standard combinations are shown in above chart but can be specified to customers wish.

For leather slat blinds there is the option of a leather covered headrail at an additional cost.

Leather covered slats cannot be specified with decorative (external) slat tapes. The blind hardware is supplied matched to the slat colour.

Side guides for stabilising blind system and sloped applications (up to 15°) from vertical.

A and B: Fitting of side guides inside window frame
(A: detail eyelet / B: detail wireholder)
C: Fitting of side guides onto front of window frame

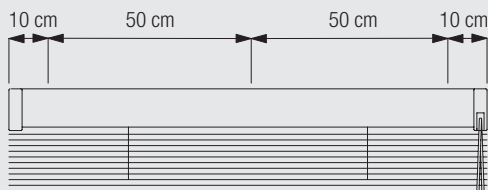

The system 8910 can be equipped with side-guides wires and can therefore also be used for sloped up to 15° incline from vertical.

Fitting Information

WARNING

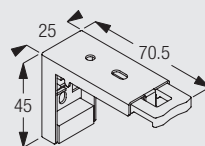

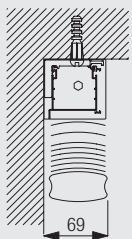

Young children can be strangled by loops in pullcords, chains, tapes and inner cords that operate the product. To avoid strangulation and entanglement, keep cords out of the reach of young children. Cords may become wrapped around a child's neck. Move beds, cots and furniture away from window covering cords. Do not tie cords together. Make sure cords do not twist to create a loop.
